

**AMENDMENTS TO THE SPECIFICATION**

Kindly amend the specification, without prejudice, without admission, without surrender of subject matter, and without any intention of creating any estoppel as to equivalents, as follows.

Please amend the Abstract of the invention as follows:

-- A pyrotechnical firing installation comprises a plurality of detonators (3, 4), each with an ~~electric~~ electrical cable (5, 6) comprising at least two connection conductors, and a surface line to which is connected the cable of the detonator. The surface line is formed by sections. Every section comprises a terminal or end part (5a, 6a) of the ~~electric~~ electrical cable (5, 6) coming from a detonator (3, 4) and an end connector (7, 8) to electrically connect this terminal part (5a, 6a) to the cable of the next detonator, at a point of the latter defining the origin of its terminal part.--

Please substitute the specification with the attached substitute specification.
